

6/5/2020 – WA Safe Start Plan Overview – Safe Start allows for some flexibility for counties that do not meet the metrics needed to move to Phase 2. These counties may be eligible to temporarily move into a “modified” Phase 1 or “Phase 1.5” that allows some Phase 2 activities to begin while waiting for Phase 2 approval.

Our WBG reopening guide can be found [here](#). Breweries located in counties entering into Phase 3 must continue to adhere to the established Phase 2 health and safety requirements and written plan, but may increase occupancy from 50% to 75% and may increase the cap on parties at a table from 5 to 10. Phase 3 also allows bar areas to open at 25% capacity.
