

Same tanks, only much smarter.

Introducing BrewMonitor® System 2.0

The world's first real-time, comprehensive fermentation monitoring system, with intelligence to spare.

Streamline Beer Quality Management with Always-On Fermentation Insights & Issue Prevention

The BrewMonitor System is a real-time fermentation monitoring and analysis solution, purpose-built to enable brewers to increase quality and profitability through enhanced fermentation-process control. BrewMonitor collects fermentation data from your existing tanks in real-time and streams it to any PC, tablet or smartphone, 24-7.

BrewMonitor System 2.0 breaks new ground with productivity tools that dramatically simplify yeast vitality assessment and quality control analysis. With just a few mouse clicks or taps on your smartphone, your fermentation tank data is transformed into a powerhouse of actionable insight – helping your team ensure consistency, prevent fermentation problems, reduce labor, and lower costs.

Total Visibility: Any Time, Any Device

The BrewMonitor Sensor Hub attaches easily, cleans easily and live-streams critical data to your web-enabled devices:

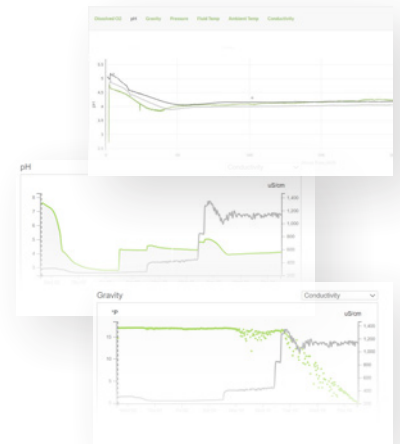

Quality Control Processes, Simplified.

Get immediate, actionable information to inform your most important production decisions:

- *Batch-to-Batch Quality Analysis* helps easily ensure consistency and improve the quality of your operational processes.

- *Yeast Vitality Trends* accelerates yeast vitality assessment for more timely repitches, prevention of stalled fermentations and more, saving time and cost.

Solve Brewing Problems

- ✓ Fermentation failures
- ✓ Demand outstripping production
- ✓ Quality control issues
- ✓ Ensured consistency and reproducibility
- ✓ Reduced margins
- ✓ Lack of data

Key Benefits

YES...

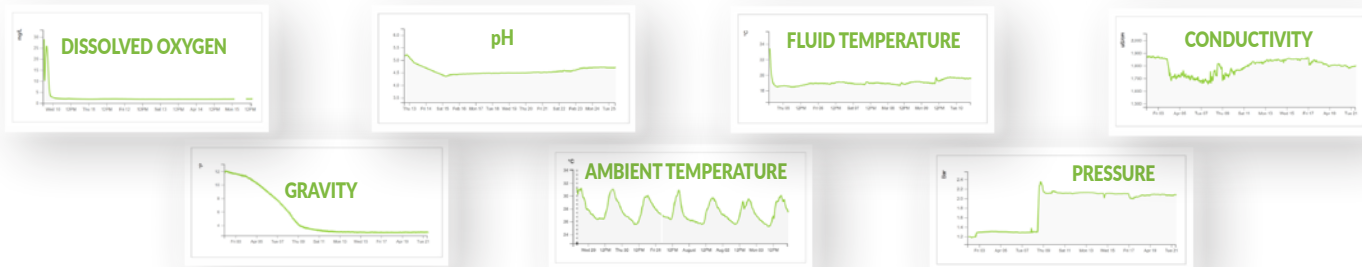

- ✓ Consistency
- ✓ Reproducibility
- ✓ Efficiency
- ✓ Profitability

NO...

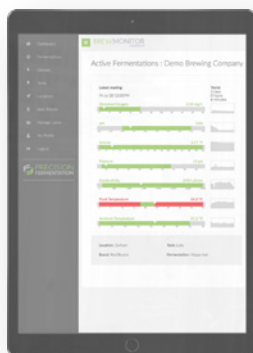

- ✗ Major capital investment
- ✗ Additional labor
- ✗ Tank purchases
- ✗ Facility expansion

BREWMONITOR® SYSTEM

Critical Measurements at Your Fingertips, 24-7

Actionable Insights – Compare, Analyze and Solve with Ease

- View all active fermentations, from multiple locations in a single dashboard
- Receive automatic alerts about problems, via email and text, using user-selected alert thresholds per fermentation
- Expand quality control processes to improve outcomes
 - Get a graphical start-to-finish view of your fermentations from continual sampling
 - Replace traditional “snapshot” sampling with exponentially more data: 1,000 data points per day
 - Perform yeast vitality checks with a few mouse clicks
 - Easily benchmark and compare batches for consistency
- Enter and save manual measurements together with automatic readings for centralized storage and full analysis of all data sources

Tech Specs / Requirements

BrewMonitor Sensor Hub

Power: 110V AC
 Filter: Low-profile, external filter
 Dimensions: 10" wide x 13" tall x 8" deep
 Weight: 14 lbs.
 SmartClean software-driven cleaning process:
 Use supplied adapter and approved chemicals

BrewMonitor System

Internet connection: Broadband recommended (not required)
 WiFi: Open network or password-only accessed network required
 Web browser: HTML 5-compatible, JavaScript-enabled
