

Know Your Brew.

If your tanks could talk, what would they say?

Introducing **BrewMonitor.**

The world's first real-time,
comprehensive fermentation monitoring system.

WWW.PRECISIONFERMENTATION.COM

YOU ARE INVITED!

TRY BREWMONITOR® FREE FOR 30 DAYS:
GET FERMENTATION DATA, PAY NOTHING.

The BrewMonitor System is here, and we are beyond excited to get it into brewers' hands. So, we're making it beyond easy for you to get started:

- Try BrewMonitor on your fermentation tank(s).
- Track your fermentations' data for up to 30 days.
- Discuss your results with us.

What You Get

Critical Measurements, Accessible from any PC, Phone or Tablet

Dissolved Oxygen • pH • Density • Pressure
Temperature (Internal/External) • Conductivity

The Data You Need to Solve Problems and Improve Products

Fermentation Failures • Production Capacity Limits
Quality Control • Consistency & Reproducibility

Talk with your Precision Fermentation representative to get started today, or send us an email:
